LIFE COACHING

FAITH-BASED MENTORSHIP

HANDS-ON EXPERIENCES FOR JOB READINESS

AUTOMOTIVE WOODWORKING FABRICATING & WELDING SMALL ENGINE COMPUTER DESIGN CONSTRUCTION AND MORE

Zach, who has already experienced a few different areas that Walking Tall has to offer, has settled nicely into the beginner's computer design and 3d printing department. His grandpa, who is a Mentor in the small engine shop, invited him to come to visit Walking Tall,

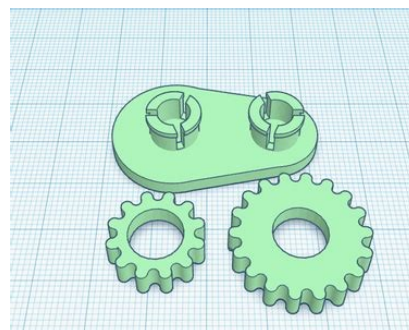

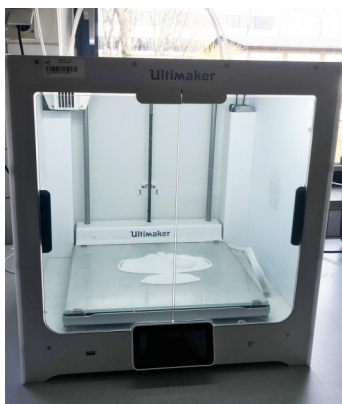

3D-printed objects begin with a digital blueprint created using computer-aided design (CAD) software. From there, the only limitations for these creators are access to raw materials for the printing process and their imagination.

Zach says, "Giving out my ideas to others used to be challenging for me because of the fear of rejection, but here at Walking Tall, they allow me to share my ideas, and that's pretty cool."

He appreciates his Mentor, Mark, who has helped him with confidence and knowledge. Zach shares, "I'm able to create things and use my imagination, and Mark is nice and chill."

Zach is motivated to help others have a good day, and his goal is to attend college and study to be an architect someday.

His motto is, try hard and have fun!

Let us then approach God's throne of grace with confidence, so that we may receive mercy and find grace to help us in our time of need.
Hebrews 4:16

Thank you for your prayers and support

*If you haven't ever supported Walking Tall, please consider a one time donation or regular monthly donation to support and continue offering many skills to these young men. Thank you so much!
Walking Tall: PO Box 3789 Central Point, OR 97502 or walkingtallso.org for online donations.*
