AUTOMOTIVE WOODWORKING FABRICATING & WELDING SMALL ENGINE COMPUTER DESIGN CONSTRUCTION AND MORE

Learning without Limits

Elijah enjoys math in school and aspires to become an electrician someday. In his spare time, he plays video games and enjoys outdoor activities such as camping, fishing, paddleboarding, and skateboarding. He has also recently acquired his driver's permit.

Participating in various activities with Walking Tall helps him acquire valuable skills for his future. He has a passion for mechanics and is gaining practical automotive experience from his mentor, Dan D. in the automotive shop on Wednesdays. On Mondays, he learns how to use the CAD (Computer-Aided Design) program with his mentor, Mark. This advanced software is essential for creating detailed designs for laser engraving, a technique he uses to produce custom signs. Although he finds design work on the computer challenging, he still enjoys the process.

Elijah comes both Monday and Wednesday, and invited a friend to join him at Walking Tall, where they spend time together before and after their project sessions. Elijah stated, "I believe that Walking Tall has helped me strengthen my faith by discussing scriptures each week and learning about the gospel. The support from Walking Tall is really helpful for us, as it boosts our confidence and teaches us lifelong skills."

May the God of hope fill you with all joy and peace as you trust in him,
so that you may overflow with hope by the power of the Holy Spirit.

Romans 15:13

Thank you for your Prayers and Support

*If you would like to partner with Walking Tall, please consider a one time donation or regular monthly donations to support and continue offering many skills to these young men. Thank you so much!
Walking Tall: PO Box 3789 Central Point, OR 97502 or walkingtallso.org for online donations.*
